EXAMINER

CHOE, HENRY

ART UNIT

PAPER NUMBER

2817

DATE MAILED: 12/22/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	10/672,743	MASUDAYA, HIDEKI	
	Examiner	Art Unit	
	Henry K Choe	2817	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-4 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-4 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 26 September 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Delano (Fig. 1).

Regarding claim 1, Delano (Fig. 1) discloses an amplifier circuit comprising a first switching device (102) having one end (drain of 102) which is connected to a power supply (+V), a second switching device (104) having one end (drain of 104) which is connected to another end (source of 102) of the first switching device (102) and another end (emitter of 104) which is connected to ground (-V), a load (antenna) which is connected to a junction point (a node between transistors 102 and 104) of the first switching device (102) and the second switching device (104), and the driving circuit (108) and a control electrode (gate of 102) of the first switching device (102) as well as the driving circuit (108) and a control electrode (gate of 104) of the second switching device (104) are connected through a common mode filter (110).

Regarding claim 2, the common mode filter (110) is constituted of two solenoid coils (upper 110, lower 110) concentrically wound around the same core in the same direction.

Claims 3 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Andreatta (Fig. 2).

Regarding claim 3, Andreatta (Fig. 2) discloses an amplifier circuit comprising a first switching device (10) having one end (11) which is connected to a power supply (B+), a second switching device (12) having one end (13) which is connected to another end (17) of the first switching device (10) and another end (18) which is connected to ground (ground), a third switching device (20) having one end (21) which is connected to the power supply (B+), a fourth switching device (22) having one end (23) which is connected to another end (27) of the third switching device (20) and another end (28) which is connected to ground (ground), a load (40) which is connected to a junction point (54) of the first switching device (10) and the second switching device (12) and a junction point (56) of the third switching device (20) and the fourth switching device (22), and the driving circuit (14) and a control electrode (15) of the first switching device (10) as well as the driving circuit (14) and a control electrode (19) of the second switching device (12) and the driving circuit (14) and a control electrode (25) of the third switching device (20) as well as the driving circuit (14) and a control electrode (29) of the fourth switching device (22) are respectively connected through a common mode filter (30).

Regarding claim 4, the common mode filter (30) is constituted of two solenoid coils (32, 34; 36, 38) concentrically wound around the same core in the same direction.

Art Unit: 2817

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Patent numbers (4,554,512; 6,605,991) are the switching amplifiers.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Henry Choe whose telephone number is (571) 272-1760.
